Location

WOODRUFF COUNTY --- FITZHUGH [35.35, -91.32] 04/30/10 22:40 CST 0

Date/Time

Hail (1.00 in) 04/30/10 22:40 CST 0 Source: Amateur Radio

Moisture from the Gulf of Mexico surged into Arkansas at the end of April, so conditions in the state became warm and humid. On the 30th, a strong area of low pressure aloft approached from the west, resulting in the development of thunderstorms. Wind shear, a change in wind direction and speed with height, was present. This created a favorable environment for the formation of tornadoes.
